

We're Here for You!

To access our services please contact our service center for additional information. Northside accepts Medicaid and Medicare HMOs, some Commercial insurance, and receives state funding for some services. Please contact us to determine if you are eligible for this funding. A sliding fee scale option is also available.

All Outpatient services provided at our Main Center begin with an intake assessment completed by a qualified therapist who conducts a biopsychosocial evaluation and makes necessary recommendations and referrals for care and treatment options. These services are provided via a pre-registered Access to Care appointment. Our Access to Care appointments are available at the Main Center Monday thru Thursday. Please call our office and select Option 3 to schedule your initial appointment.

The Community Support Services Division serves adults with a serious and persistent mental illness who are 18 years and older who have a diagnosable behavioral disorder that has resulted in functional impairment which substantially interferes with or limits one or more major life activities. A referring agency representative or a self-referral makes contact with the staff via telephone or written application or in person. The respective staff member completes a screening form and if it is determined that the applicant is eligible, the staff schedules

an intake appointment within five (5) business days. Depending on availability and need, urgent appointments may be scheduled sooner.

- A multi-disciplinary team that assumes responsibility for directly providing acute, active and on-going community-based psychiatric treatment to maximize a client's recovery ensure client-directed goal setting, assist in helping those served become respected members of their community.

PATHWAYS

Pathways is a new and innovative program providing coaching and navigation to patients and families who are seeking help for mental health and substance abuse issues. This program will assist individuals and their families on their journey through the maze of mental illness and addiction, connecting them with urgent and routine clinical resources in Hillsborough County.

INTERMEDIATE CARE PROGRAM (ICP)

Individuals whose complex mental health and substance abuse needs not currently being met by the existing system of care who are frequently homeless and repeatedly seek costly treatment through hospital emergency departments, crisis stabilization units, and detoxification units without reaching the optimal goal of recovery are the most vulnerable populations in Hillsborough County who will benefit from the ICP. Participants must be enrolled in the Hillsborough County Health Plan; would not require inpatient crisis stabilization and/or detoxification treatment, but their care needs would exceed the needs of traditional residential/outpatient care. The ICP will afford them residential placement for a sufficient period for recovery and full reintegration into their respective communities.
